Dear Mr. Kumpf:

This is in response to your letter dated January 11, 1983 with reference to hazardous waste fee payments made to Peoria Disposal Company for waste cinders from Pitch Burning process.

Our records show that:

1. On July 7, 1982, Peoria Disposal Company (PDC) applied for a renewal of Waste Stream Permit No. 791040; the waste cinders on this application were classified as hazardous waste (D006) by PDC; permit was granted as hazardous waste with an expiration date of September 3, 1983; because of the change in waste classification, a permit was issued under 821944.
2. On October 14, 1982, PDC requested a reclassification of waste on the basis of exemption under 40 CFR 261.4 (b) (4). The Agency accepted the new determination of waste classification and regranted the permit with an expiration date of October 22, 1985. This time the permit was granted under old No. 791040.

Based on the above, it is clear that this Agency classified the subject waste according to the declarations made by your company and Peoria Disposal Company. For your convenience, the copies of the above permit applications are enclosed herewith. Under the circumstances, I suggest that you contact Peoria Disposal Company directly for any reimbursements of hazardous waste fees.

Dear Ms. Chaturvedi:

The purpose of this letter is to recover \$2100.80 in EPA hazardous material charges. We originally had our permit 791040 for cinder disposal which was non-hazardous. The permit was to expire on 8/13/82 at which time a renewal request was applied for. We received permit 821944 for cinders which was classified as hazardous. Upon our objections to the reclassification, permit 791040 was renewed as non-hazardous.

Attached are copies of the invoices that we paid to the disposal company.

Can you help in recovering this tax on an over-charge for cinders?

Your comments, please.

Thank you.

Sincerely,

Dale C. Kumpf

Sherex Chemical Company, Inc. and Peoria Disposal

Chronological history on 791040 and 821944

1. June 25, 1979 -- Peoria Disposal Company (PDC) application received for disposal of Sherex Chemical's (SC) waste; permit granted with expiration date of August 13, 1980; waste classified as 67; no waste definition in place; permit number 791040.
2. June 4, 1981 -- PDC reapplied for SC's waste; permit granted with expiration date of August 13, 1982; waste classified as non-hazardous (80); permit number 791040; Illinois waste definition used.
3. July 7, 1982 -- PDC reapplied for SC's waste; PDC classified waste as hazardous (D006); permit granted as hazardous classification with expiration date of September 3, 1985; permit number changed to 821944; USEPA waste definition used.
4. October 14, 1982 -- PDC reapplied for SC's waste on the strength of a letter from SC claiming their waste to be non-hazardous under 40 CFR 261.4(b)(4); Agency accepted the new declaration of waste; granted a permit with expiration date of October 22, 1985 as non-hazardous waste; permit number changed back to 791040.
